### TASK

#### 1 Yahoo animated image hyperlink

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">
  <title>Tugas1</title>
</head>
<body>
  <marquee behavior="" direction=""><a href="https://www.yahoo.com/"
target="_blank"></a></marquee><br>
<bblink>blink</bblink>
</body>
</html>
```

## Results

### 2. Explain of these function

1. `<a href='halaman2.html'>`: This creates a hyperlink that directs users to the "halaman2.html" page when clicked.
2. `<a href='http://www.google.com'>`: This creates a hyperlink that directs users to the "www.google.com" website when clicked.
3. `<a href='referensi'>`: This creates a hyperlink that directs users to a page or location named "referensi" within the same website or context.
4. `Target='_blank'`: This attribute is used within an `<a>` tag to specify that the link should open in a new browser window or tab.
5. `<input type='checkbox'>`: This creates a checkbox input field that allows users to select multiple options.
6. `Name='cekSing'`: This assigns a name to the checkbox input field, which is useful for identifying the input when submitting a form.
7. `<input type='text'>`: This creates a text input field where users can enter text.
8. `Id='txtKota'`: This assigns an identifier to the text input field, which can be used for targeting the field with CSS or JavaScript.
9. `Maxlength='20'`: This attribute sets the maximum number of characters that can be entered into the text input field to 20 characters.
10. `<textarea></textarea>`: This creates a multi-line text input field where users can enter longer passages of text.
11. `Cols='20'`: This attribute sets the number of visible columns (characters wide) in the textarea.

12. `&nbsp;`: This is the HTML stand for a non-breaking space, which is used to create space between elements and prevent line breaks.
13. `<marquee>...</marquee>`: This creates a scrolling text or image effect within the specified element.
14. `<blink>...</blink>`: This creates a blinking effect for the enclosed text or content. but it's not supported in modern browsers and considered bad practice for accessibility reasons.
